- MARKBOOKS WITH MULTIPLE USERS
- WORK ON TABLETS AND DESKTOP
- YOUR MARKS ANYWHERE

100% COMPATIBLE WITH OUR DESKTOP MARKBOOK SOFTWARE  
 USE IT IMMEDIATELY BY IMPORTING YOUR EXISTING MARKBOOKS, OR  
 IMPORT NEW DATA AND START SAVING TIME TODAY.

## ONLINE MARKBOOK IN SYDNEY. FAST.

AUSTRALIAN DESIGNED AND HOSTED  
 TO ENSURE FAST RESPONSE TIMES AND NO WAITING.

Hosted on servers located at Mascot, Sydney, Markbook Online is fast. Being local means unlike a system hosted overseas, there is minimal waiting for the browser to refresh. Your data is stored here in Australia so there is no delay caused by a round-trip of information travelling overseas and back to slow you down.

### TEACHERS ARE FREE TO USE ANY PLATFORM WITH MARKBOOK ONLINE MOBILE, DESKTOP, TABLET, WITH MOUSE OR TOUCH INTERFACE

Teachers no longer want to be restricted to a single type of device or platform to do their work. Markbook Online works on desktop and mobile devices with equal ease. Whether you are at a PC with Windows or a Mac and OS X, Markbook Online provides the same features and experience. All the popular web browsers are supported: Internet Explorer or Safari, Chrome or Firefox are equally suitable. Carefully coded to not require special plugins or browser features, Markbook Online really can work anywhere. But the desktop is only the beginning.

Mobile devices are equally supported. Apple iPad and iPhone, or an Android tablet with a touch screen are ideal for using Markbook Online on the go, or when a desktop workstation is unavailable.

When used on a small mobile device such as an iPhone, the interface scales down for efficient use of the smaller screen so you can use Markbook Online in the most effective way, while still allowing full use of the screen when used from a large workstation.

With Markbook Online we started with the interface from our previous markbook systems because few people like learning a new application interface, or have the time to do so.

All of the menus are organised in a similar way with the top level menus of File, Edit, New, Print, Action, Tools, Options, Help. The toolbar has buttons in the same order as SM-Marks and Teacher's Personal Markbook.

To work in a browser there are differences in the Navigation that is detailed in the 10 Minute Guides and the Video Tutorials. As part of this redesign we made sure that everything can work on a touch screen device without requiring a mouse or physical keyboard.

With tutorial videos, and a complete help system with a search function, Markbook Online simplifies the transition from a markbook running on local workstation, to the online solution.

### MULTI-USER ACCESS TO DATA

All teachers responsible for a class in a markbook can open the same markbook and edit results simultaneously. No longer do teachers need to negotiate "who has the markbook file" and work one at a time. With Markbook Online the problem of waiting for, or copying files is eliminated. No more lost markbooks, or time wasted because someone else has opened the markbook you need to use. Working from home no longer requires a school portal to negotiate, or concerns about using USB drives to transport markbook data.

### A MARKBOOK YOU CAN TRUST

Markbook Online is based on the popular SM-Marks and Teacher's Personal Markbook software. Designed by a Sydney University graduate who majored in Pure Mathematics and Computer Science we understand software. As a member of the Australian Computing Society we practise and believe in high standards and professional service.

- **DECADES OF MARKBOOK EXPERIENCE**
- **COMPATIBLE CALCULATIONS**
- **RIGOROUSLY TESTED MATHEMATICS**

If you have not used our other markbook software, you can be confident that all calculations have been rigorously road-tested and relied upon by teachers processing their H.S.C. and junior student results for over two decades. Weighting, standardising, moderating, grading and ranking are all part of Markbook Online with reliable formulae built-in. The calculations are identical to SM-Marks and Teacher's Personal Markbook so you can trust the mathematics and use a familiar process with confidence.

### SECURE DATA AND FLEXIBLE BACKUPS

Every 24 hours we create a full backup of all your markbook data. These daily backups are stored for a minimum of 90 days. If required, these backups let us rollback an individual markbook, without affecting any other markbook, to any day in the past 3 months. All data is stored with identifying information securely encrypted with 128 bit SSL methods. With Markbook Online you can be confident that your results are securely stored with multiple backups. This is more secure than using individual markbook files with a desktop based markbook.

Schools can maintain their own backups. While knowing there is a centralised backup gives peace-of-mind, you still retain the ability to make your own local backup. A local copy of any markbook can be made at any time at your school, or you can choose to backup all your school markbooks with a single command.

Backups you make are stored as markbook files with the "mk" extension that can be read by our other markbook software, SM-Marks and Teacher's Personal Markbook. This means using Markbook Online does not restrict or permanently bind your data to the online system. You control the data and have complete control.

- **DAILY AUTOMATIC BACKUPS**
- **SECURE 128 BIT ENCRYPTION**
- **KEEP CONTROL WITH YOUR OWN BACKUPS**

### ZERO INSTALL SOLUTION

Markbook Online is the markbook solution that your ICT support staff will appreciate. It is a zero install solution. There is absolutely no software to install, either on the school network servers, or on the teacher client machines. With nothing to install or maintain software updates and support issues are in the past. Point your teachers to the markbook address in their preferred web browser and Markbook Online "just works".

Without requiring any browser plugin, Java or other propriety software, Markbook Online is a technical support dream. Designed from the beginning not to require cookies, this can run on almost any browser, even if you are locked into an older browser, or teachers at home have not updated their computer to the most recent operating systems.

### USERS MAINTAIN THEIR OWN PROFILE

Users can edit their login and real name and change their own password. If a password is forgotten the reset password facility can be used by teachers to get a fresh password emailed to them. ICT staff and administrators never need to help staff log into Markbook Online. After importing a list of teachers at your school the user administration is complete.

### IMPORT EXISTING DATA

Teachers with existing SM-Marks or Teacher's Personal Markbook files can import them directly and start work immediately without re-entering data. For teachers without existing markbooks, external files of data can be imported to create new markbooks without manually typing in the information. Several simple comma and tab delimited formats are accepted and detailed in the documentation. If you have a specific format that is different from the supported formats, contact us and we can advise you on possible alternatives.

### REGISTER NOW FOR FREE TRIAL

You can register for a free 90 day trial at:

<http://markbookonline.com>

The free trial gives full access to Markbook Online and you can create login accounts for all teachers at your school. If you have any questions about the trial, or general questions, please send an email to:

## HELPING SCHOOLS WITH AFFORDABLE ONLINE MARKBOOK SOLUTIONS

At Scott McDonald Personal Computer Services we believe that time saving productivity software for Australian teachers and schools can be affordable. We produce quality software solutions that for over 20 years have been saving the time and effort of teaching professionals.

Our software focuses on a task and does it well. All encompassing systems that attempt to do everything, find it difficult to do any one task well. By concentrating on markbook and reporting solutions for over two decades we have an extensive list of clients. This demonstrates we solve real problems with effective and proven software systems.

Markbook Online has a simple subscription plan that provides a multi-user markbook that requires no installation or special support from your ICT department. The subscription cost is a small fraction of the typical cost of hosting and supporting a markbook on your own network servers. Markbook Online is the online solution that costs less than you expect.

Thousands of hours of coding experience went into the design of Markbook Online to result in a system that simply works well. We produced our first markbook in 1991 and since then we have refined and mastered what it take to create reliable solutions and have put that experience into our latest markbook.
